MD. KHALID AURANGOZEB has been serving at the Rural Development Academy (RDA), Bogra from 2004 to date. His present position in RDA is Deputy Director. His tenure of service he has proved himself worthy and innovative in design and implementation of action research related to seed production, processing, and storage by farmer's participatory approach. Further, the track record during his service period in the academy proved that he has sufficient skill and expertise in conducting training programs on farm management, nursery development, and soil health management for the different levels of participants. He is also involved in action research activities in the field of plant health (Rural plant clinic), Community biogas, women in seed enterprise (WISE) and Fostering Women Voices through Videos in Bangladesh. His educational background is B.Sc (Hons) in Agriculture and M. Sc in Agricultural Extension Education from Bangladesh Agricultural University (BAU), Mymensingh. He did his second Master degree form Khon Kane University, Thailand in Rural Development Management (MRDM). He has also received training in the field of soil and water management from (EICA) Egypt, Rice breeding course from International rice research institute (IRRI), Philippine. He has a lot of publications related to agriculture and rural development.
