Acknowledgement

The present study was conducted to know the awareness level of the farmers regarding Artificial Insemination (A.I) services of cows, to asses the use of A.I. and to find out the constraints to A.I. services in the Northern region of Bangladesh.

The author would like to express his gratitude to Mr. Sk. Zahrul Ferdous, Director (Agril, Science Division) and Additional Director General (in charge) for his constant persuasion, encouragement and valuable suggestions for completion of this study.

The author is grateful to Mr. Md. Abdur Rahim, former Director General of the Academy for allowing him to undertake the research and providing necessary administrative support service, time to time.

He also like to thank Dr. Md. Habibur Rahman, Joint Director, for going through the report and making necessary comments and correction.

The author also like to thank Mr. Md. Munsur Rahman, Assistant Director, Dr. Md. Abdur Rashid & Md. Abdul Khaleque, Deputy Director, for providing computer facilities as well as processing the primary data in tabulation form.

Finally, the author express his sincere thanks to Messers Md. Abdur Razzak, Research Supervisor, Md. Abdul Khaleque, Tabulator. Md. Hemayetul Islam, Research Investigator for their hard work in collection and processing of data. The author also extends his thanks to Mr. Md. Nurul Islam, Typist for composing the manuscript.
